

## XIM™ Standalone Coil-On Plug Ignition Kits

**New XIM™ Standalone Kits provide best solution to coil-on plug ignition and the most reliable way to run a carburetor or EZ-EFI™ on modern engine platforms**

The engineers at FAST™ have taken the XIM™ to a whole new level. The coil-on plug ignition controller, originally developed for use with FAST™ XFI™ systems, is now available in a standalone kit for GM LS1/LS6 and LS2/LS3/LS7, Ford Modular, and 5.7 & 6.1 Hemi engines.

These new kits enable programmable control of the popular late model coil-on plug ignition systems, independent of the fuel delivery method or any factory computer. The Standalone XIM™ features simple-to-use on-board adjustments to dial in a customizable timing curve (as opposed to a collection of pre-set curves) and to adjust a vacuum advance feature and rev limiter.

This bolt-on solution to coil-on plug ignition is the easiest and most reliable way to run a carburetor or the FAST™ EZ-EFI®. This is a complete kit, it does not require XFI™ or OE computer. These kits are ready to run out of the box, but do allow some optional tuning features if desired.

For more information about the FAST™ XIM™ Standalone Coil-On Plug Ignition Kits or any other FAST™ product, call us at 1-877-334-8355, or visit us online at [www.fuelairspark.com](http://www.fuelairspark.com).

### Quick Summary

**Product:** FAST™ XIM™ Standalone Coil-On Plug Ignition Kits

**Part Numbers:** #3013112 (LS1/LS6); #3013122 (LS2/LS3/LS7); #3013132 (Ford Modular); #3013162 (5.7 Hemi); #3013142 (6.1 Hemi)

### Features & Benefits:

- Bolt-on solution to coil-on plug ignition allows for running a carburetor or EZ-EFI®
- Easy-to-use on-board adjustments to dial in a customizable timing curve and to adjust a vacuum advance feature & rev limiter
- Enables control of popular late model coil-on plug ignition systems, independent of the fuel delivery method or any OEM computer
- Available for GM LS1/L2/LS3/LS6/LS7, Ford Modular and 5.7/6.1 Hemi
